The objective of this project is to find the rush times of people who use the MTA service in the days before Independence Day.

To start exploring the data, I first understand the data and clean the noisy, and inconsistent data. Also, I have been added the needed columns that helped me to well-exploring the data.

The figure above describes the Top 5 busiest stations in year 2018, which are presented in the figure. Also, through my analysis, I found that the top one busiest station in this figure for year 2018 was the same in the rest of the years I analyzed.
